

Villa Interior Design

The interior of each villa consists of the open plan living room kitchen living room, a wc and two bedrooms with bathroom.

Living Room

The living room is facing the fireplace and parallel to the large opening overlooking the outside environment, the pool and the sea.

Near the living room is placed the kitchen in shape "Г" and in the middle a spacious dining room.

Simple and clean design lines characterize this project, emphasizing the construction details, the aesthetics and the functionality of each house. The choice of materials was based on the creation of a familiar, user-friendly space, with elements of discreet luxury.

The color palette that was followed is in earth tones, with some colorful decorative touches, giving a playful note to the space.

Bedrooms

Earth tones also dominate the bedrooms with an extra touch of luxury with a little color in the fabrics (burgundy-sweet brown) and gold details in the metallic elements.

The wood paneling on the walls in combination with the pressed cement mortar and the hidden lighting intensify the romantic aspect of the room

The fluent design and the specially made furniture serves both the functionality and the aesthetics of the space without obstructing the natural light.
